 - **Flash Sales & Discounts** (Dynamic pricing for promotions)
 - **Subscriptions & Bundles** (Monthly/yearly learning plans)
-

4. Order & Payment System

✦ Components:

- **Cart & Checkout Flow** (Users can buy courses & products together)
- **Payment Gateway Integration** (Stripe, Razorpay)
- **Order Tracking** (Live updates on product delivery)

✦ Q-Commerce Optimization:

- **Instant Enrollment Post-Payment** (No waiting for access)
 - **Auto-Generated Invoice & Email Notifications**
-

5. Reservation & Scheduling System

✦ Live Classes & One-on-One Sessions:

- Students can **book time slots** for live Q&A or tutoring.
 - **Google Calendar / Zoom API Integration** for scheduling.
 - Automated reminders & rescheduling options.
-

6. Admin Dashboard & Analytics

✦ Course & Order Management

- Track sales, enrollments, and user activity.
- Manage refunds, cancellations, and instructor payouts.

✦ Q-Commerce Analytics

- Sales trends, most purchased courses, and high-demand products.
 - Performance insights for marketing strategies.
-

7. API Integration & Performance Optimization

- ◆ **Sanity CMS API** → Manage courses, products, orders.
 - ◆ **Next.js API Routes** → Handle backend operations.
 - ◆ **Caching & Optimized Queries** → Fast-loading pages & reduced API calls.
-
